SUMMARY

Computer Science Engineering (AI & ML) graduate with hands-on experience in **Python, Flask, MySQL, and full-stack application development**. Strong foundation in **DSA, DBMS, OOP, Operating Systems, and Software Engineering principles**. Experienced in developing web applications, integrating databases, and building scalable software solutions through internships, academic projects, and hackathons.

EDUCATION

Mysore College of Engineering and Management <i>B.E. in Computer Science Engineering (AI & ML) CGPA: 8.1</i>	Mysore, Karnataka 2022 – 2026
JNVH <i>Pre-University Course (PUC) — 72.4%</i>	Chamarajanagar, Karnataka 2020 – 2022
Seva Bharathi English Medium High School <i>SSLC — 89.2%</i>	Chamarajanagar, Karnataka 2020

SKILLS

Programming Languages: Python, C, SQL
Web Technologies: HTML, CSS, JavaScript, Flask
Databases: MySQL, MongoDB
Core Computer Science: DSA, DBMS, OOP, OS, CN
Tools & Technologies: Git, GitHub, Power BI, Streamlit
Concepts: REST APIs, SDLC, Problem Solving, Debugging

EXPERIENCE

Unlox <i>Applied Data Science Intern</i>	Feb 2026 – May 2026
– Performed data preprocessing, cleaning, and transformation on real-world datasets using Python. – Conducted exploratory data analysis (EDA) to identify patterns, trends, and business insights. – Created visualizations and analytical reports to support data-driven decision making.	
Kodnest <i>Python Full Stack Intern</i>	Feb 2026 – Present
– Developed Python-based applications using Flask and MySQL while following software development best practices. – Applied object-oriented programming, data structures, and algorithms to design efficient solutions. – Built and tested web applications through rapid prototyping and iterative development.	

PROJECTS

Zaayka – Food Delivery Platform <i>Python, Flask, MySQL, HTML, CSS, JavaScript</i>	Codestorm 2026
– Developed a full-stack food delivery platform within a 24-hour hackathon using Flask, MySQL, HTML, CSS, and JavaScript. – Implemented user authentication, order management, and database operations for seamless application functionality. – Collaborated in a team environment to deliver a working prototype that secured the Runner-Up position.	
Secured Organic Agro <i>Python, Flask, MySQL, IoT, Machine Learning</i>	Apr 2025 – Nov 2025
– Developed a smart agriculture platform for real-time crop monitoring and supply chain transparency. – Implemented data collection, preprocessing, and analytics pipelines for data-driven decision making. – Integrated IoT sensor data with machine learning techniques to improve agricultural insights.	
Social Media Engagement Intelligence System <i>Python, Streamlit, Power BI, NLP, Pandas</i>	Apr 2026
– Developed an analytics dashboard to analyze audience engagement, virality, and sentiment trends. – Implemented NLP-based sentiment analysis and trend detection techniques. – Generated actionable insights and content recommendations using data analytics.	

- Built a machine learning model to predict customer churn and support customer retention strategies.
- Performed data preprocessing, feature engineering, and classification modeling using Scikit-learn.
- Identified key factors influencing customer retention through exploratory data analysis.

ACHIEVEMENTS

- Completed **Deloitte Data Analytics Job Simulation (Forage)** with exposure to data analysis and forensic technology workflows.
- Completed a certified **Data Analytics Internship Program** by Jyesta Corporate Unity (Sep–Nov 2025).
- Completed **NoSQL Ninjas: MongoDB Edition** bootcamp with project, organized by Devtown and Microsoft Student Chapter.
- Completed **Google Cloud Introduction to Data Analytics** program with exposure to BigQuery and cloud analytics workflows.
- Earned **NPTEL Cyber Security and Privacy** certification from IIT Madras.
